L'engin n'émet aucun bruit
et ne semble pas voler bien
haut, à cause d'un effet
d'optique dû à l'éloignement
ainsi qu'à des nuages bas
relativement proches du sol.

Le photographe et plusieurs milliers d'observateurs auraient ainsi suivi le processus de désintégration du troisième étage d'une fusée russe.

UFO-Sichtungswelle über Colorado

Den ganzen Februar 1998 hindurch kam es im US-Staat Colorado zu einer Reihe von UFO-Sichtungen. Ihren Höhepunkt nahm die Sichtungswelle am 26. Februar - am Tag einer Sonnenfinsternis.

Am 14. Februar gegen 18.15 Uhr beobachtete ein Zeuge auf dem Interstate Highway 70 nahe Glenwood Springs, 250 km westlich von Denver, ein „dreieckiges UFO“ mit „großen Lichtern an jeder Ecke. Es war lautlos und hinterließ keinen Kondensstreifen. Es überquerte den Himmel mit unglaublicher Geschwindigkeit, wobei es sich immer wieder drehte.“

Am 25. Februar sichtete ein Mann südwestlich von Colorado Springs einen mysteriösen Feuerball am Himmel, der „nach Osten flog und grün war. Er hatte die scheinbare Größe eines Tennisballs auf ausgestrecktem Arm.“

Am 26. Februar, dem Tag der Sonnenfinsternis, wurden Feuerbälle im ganzen Staat beobachtet.

In Denver wurden Fußgänger auf der Colfax Ave. von „zwei hellen Objekten“ überrascht, die plötzlich am Himmel erschienen. Eines von ihnen schien auf die Stadt zu stürzen, das andere flog in westliche Richtung.

Auf dem Colorado Highway 91, 160 km südwestlich von Denver, beobachtete ein Zeitungsreporter, Jeff Dick vom Lead-

ville Herald-Democrat, einen „Feuerball im Osten, der hell aufblitzte“. Das Denver Museum für Naturgeschichte erhielt 50 Anrufe von Zeugen, die den Feuerball gesehen haben wollen, der „westlich über Zentral-Colorado flog.“ Weitere Zeugen beobachteten ihn von Pagosa Springs, South Fork und Salida aus, andere aus dem San-Luis-Tal. Ein weiterer Feuerball wurde gegen 23.00 Uhr gesichtet.

Die Beobachtungen setzten sich auch in den folgenden Tagen fort. Auch am 27. Februar wollen Zeugen gegen 19.30 Uhr „ein großes, pulsierendes weißes Licht“ gesehen haben. Ein Ehepaar aus Salida, das auf dem Highway 285 fuhr, meinte: „Das Licht pulsierte zwanzigmal. Dabei schien das Objekt zuerst abzusteigen, um dann wieder aufzusteigen, abzusteigen und erneut aufzusteigen. Dieses Auf und Ab setzte sich fort, als es nach Westen flog.“

90 Minuten später, um 21.00 Uhr, beobachtete ein Mann auf dem Highway 160 bei Alamosa „eine Formation von drei oder vier orangen Lichtern, die über dem Blanca-Berg schwebten.“

Am 1. März um 21.00 Uhr meldete Adam T. ein „V-förmiges UFO mit fünf orangen Lichtern“ über seinem Haus am Highway 119, 80 km nördlich von Denver.

Ingrandimento 2x
dell'oggetto ripreso a
1200 dpi (seconda
foto).

BATTIPAGLIA - Aprile 1992 -

Incongruenza apparente dell'ombra sull'oggetto con quelle dell'ambiente (illuminazione proveniente dal sole, a SudEst, circa 42° sull'orizzonte, orientativamente da sinistra a destra). La parte più illuminata del "disco" è quella posteriore: valore medio di luminosità 192 con varianza 27, mentre in quella anteriore i valori sono 90 e 57.

COSA E'?

BATTIPAGLIA

Aprile 1992

Un oggetto volante transita a bassa velocità a circa 50-60 metri di distanza dalla casa del teste, che prende una macchina fotografica già pronta all'uso e scatta due fotografie.

È un corpo ellissoidale di colore grigio chiaro, con al centro un'area di colore nero.

Dopo la seconda foto, l'oggetto aumenta la propria velocità e si alza verticalmente, sparando alla vista.

Foto: M. Wajda

BATTIPAGLIA

Aprile 1992

Foto n° 2

L'oggetto risulta sempre più a fuoco rispetto alle case sottostanti. Visto che l'obiettivo doveva essere posto sull'infinito entrambi gli elementi dell'immagine dovrebbero risultare nelle medesime condizioni. Sembra che l'oggetto sia molto più vicino alla macchina fotografica delle case.

La qualità e l'esposizione delle immagini sono state migliorate su questa dispositiva attraverso un'elaborazione elettronica.

La prima foto sembra essere presa dal basso verso l'alto, mentre nella seconda l'orientamento è leggermente più verso il basso. Stranamente, l'inquadratura è accuratamente spostata verso le case.

BATTIPAGLIA - Aprile 1992 -

Esaltazione dei contorni sull'immagine a colori a 1260 punti per pollice. Non risulta alcun elemento significativo (es.: filo) sull'oggetto, sopra o sotto di esso. Da notare una specie di "sfrangiatura" in corrispondenza del bordo inferiore sinistro.

Risulta piuttosto strano che l'oggetto appaia sempre in posizione centrale nelle due foto. Sembra che si abbia avuto il tempo e la calma di inquadrarlo al meglio entro l'obbiettivo, condizione difficile da immaginare per una situazione in cui ci si trova di fronte ad un fenomeno anomalo di tal genere. Solo "fortuna" ?

A photograph of a woman with blonde hair, smiling, standing on a concrete patio next to a swimming pool. She is wearing a one-piece floral swimsuit and high-heeled sandals. The pool is rectangular and reflects the surrounding greenery. In the background, there is a white house with a dark roof and several windows. The scene is set in a tropical environment with lush green plants and trees. The overall atmosphere is relaxed and vacation-like.
